# Abstract algebra

University of Houston - MATH 3330  $\,$ 

Spring 2021

Textbook: Saracino - Abstract algebra: A first course, 2nd edition

Chapters covered:

\*The contents in these notes do not correspond exactly to the textbook

#### Contents

1	Section 1			
	1.1	Basics	1	
	1.2	Binary operations	1	
	1.3	Elementary number theory	2	
	1.4	Subgroups	2	
	1.5	Cyclic groups	2	
	1.6	Subgroups generated by a set	2	
	1.7	Direct Products	2	
2	Section 2			
	2.1	Symmetric groups	2	
	2.2	Alternating groups	2	
	2.3	Symmetries of the square	2	
	<ul><li>2.3</li><li>2.4</li></ul>	Symmetries of the square		
3	2.4			

4 Section 5			
	3.4	More homomorphisms	2
	3.3	Homomorphisms and isomorphisms	2
	3.2	Normal subgroups	2

## 1 Section 1

#### 1.1 Basics

### 1.2 Binary operations

# Definition 1.1: Algebraic structures A semigroup.

A monoid.

A group.

An abelian group.

1.3	Elementary number theory
1.4	Subgroups
1.5	Cyclic groups
1.6	Subgroups generated by a set
1.7	Direct Products
2	Section 2
2.1	Symmetric groups
2.2	Alternating groups
2.3	Symmetries of the square
2.4	Symmetric groups $S(3)$
3	Section 3
3.1	Lagrange's theorem
3.2	Normal subgroups
3.3	Homomorphisms and isomorphisms
3.4	More homomorphisms
4	Section 5
